About Me

I have been successfully involved in software and database development in my career for over 20 years. Being a database and object-oriented programmer, I have acquired analytical and logical skills to translate business needs and workflows to create programmed solutions. I am always looking for new challenges and to learn new things. I have decided to do a mid-career change and immerse myself into the web development world. I decided to enroll in professional training boot camp for full stack web development.

Technical Skills

- **MicroSoft SQL** scripting, stored procedures, SQL Agent
- **HL7 Developer (EDI)** Orion Software, HL7 ADTs
- **C# Visual Studio .Net**, **Visual Basic .Net**
