Summary

Motivated, analytical **software developer /programmer**. Experienced custom programming in **.NET Visual Studio, C# , VB, Java, Java Script HTML** with **SQL** databases, **WEB API, Ajax, Jquery** and **Bootstrap, Node js, NPM, MVC, React, MongoDB, RESTful API**. I have worked in Healthcare Industry on software development side primarily with **HL7** (EDI) , database projects . Open to any new position utilizing my experience and skill set. Willing to relocate if needed.

Professional Skills

- C#, VB , Java, HTML,Java Script, .Net programming Visual Studio, CSS, Bootstrap
- SQL Database, T-SQL, MySQL, Stored Procedures scripting, Node Js, MVC, REST API
- HL7 (EDI) development
- TCP/IP Communications
- SQL Data extraction and integration
- Visual Studio Team Management Source Control
- QA testing and planning
- Software design and logic flow
- Technical Solutions Requirements Analysis
- TFS, Git hub source control

Experience

Full Stack Web Development
University of Arizona Certification

February - July 2019 - Gilbert, AZ;

Full Stack training 6 -month program.
- Built almost 2 dozen web applications utilizing: **HTML5, CSS3, JavaScript, JQuery, Bootstrap, Node Express.js, React.js, Node.js, MongoDB, MySQL, React**.
- Developed websites using **REST API** and **MVC** frame work.
- Deployed on **Git Hub and Heroku** cloud.

LVM Systems
Data Team Integrator
Mesa, Arizona
February 2015 – October 2018
- Developed middleware solutions in .NET environment for patient and doctor data
- Project source control using Team Foundation Server (**TFS)**
- Wrote C# modules   for data migration to SQL database.
- Trouble shooting and client support for SQL data exception issues.
- Trained junior level employees with code review and debugging.
- Wrote technical documentation for client enterprise systems.
- Create service estimates of project customization and scoping of billable work.
- Deployed enterprise level modules to multiple SQL server environments for hospitals
- Write and deployed SQL Stored Procedures to automate patient integration process.
- Work closely with business groups and development team to ensure technical design satisfy the business needs.
- Supported the implementation of architecture, tools, processes to facilitate development
- Conferred with users, and team members to develop, understand and update requirements
- Conducted application software testing, prototyping review, integration development for product release.

McKesson Health
Client Support Engineer / Developer Analyst
Scottsdale, Arizona
June 2001 – February 2015
- Provided analysis for technical solution based on hospital client requirements
- Executed programming updates for application version releases
- Established product road maps and schedules with input from business groups
- Customized **C#** development, installation, and support of hospital site interfaces.
- Coded   HL7 EDI process using hospital vendors: **Epic, Cerner, Star, Touchworks, All Scripts**
- Wrote custom stored procedures Microsoft **SQL database**.
- Project management for data integration for hospital sites.
- Provided data and process analysis for patient data solutions.
- Provided consultative services on technical issues to clients and internal project teams. Installations.
- Provided training for operations personal on their support of deployed applications.
- Coded **TCP/IP** and **HL7** protocols.
- Troubleshooted technical and data issues

Schaller Anderson (Medicare Billing)
Report Writer, developer
October 1999 – June 2001
- Key Responsibilities: Custom report writing in Crystal Reports to report medical billing statistics .

- SQL database programming
- Created Disease Management statistical reporting

World Com Wireless
Contractor programmer
January 1998 – October 1999
- Program database logic for wireless billing for monthly promotions.
- Import wireless record plans using custom coding .

MicroAge
Catalog developer
August 1995 – December 1997
- Custom developer of CD-ROM product catalog for computer hardware for VAR vendors.
- Produce monthly catalogs with updated pricing .
- Code pricing algorithm key for each VAR vendor

Education

University of Arizona
Full Stack Development -Certification Program 2019 Certification
Training with tools **: HTML, CSS, JavaScript, Jquery, Ajax, web api, Postman, Firebase**,
Node.js, NPM, Ajax. Web API , RESTful API, MVC, MySQL

Brigham Young University
Bachelor's Degree , Information technology, database design
Business degree with emphasis on information technology and System Development Life Cycle
and coding development.
